### SUMMARY UPDATE

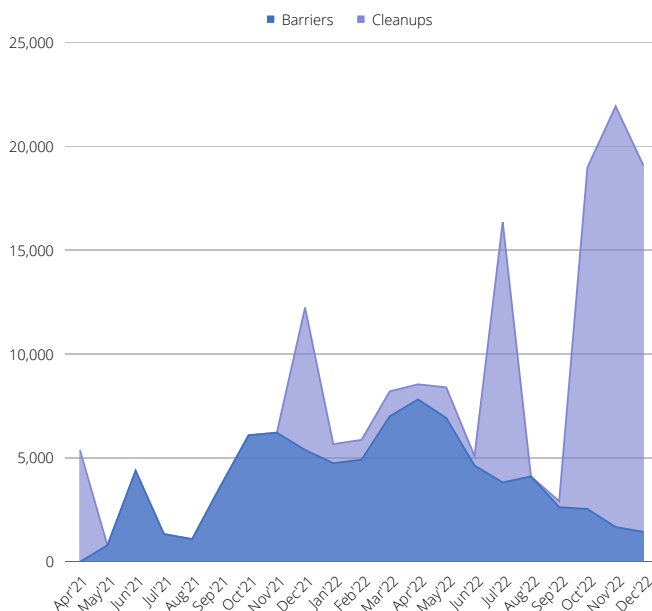

By year end we have met 99.9% of our goal of removing 270,000 kg of plastic from Bali's rivers. This quarter we have conducted 62 cleanups where we collected 54,382 kg of plastics. These cleanups consisted of a mix of beach cleanups, mangrove cleanups, many river cleanups along with the cleanup of large open dumps located by river banks.

We look forward to starting our third year of collaboration to collect an additional 135,000 kg by December 2023. To achieve this goal, we will continue to clean the Princess Traveller barriers and to organize additional community cleanups.
